Corporate Governance

Provides the tools for corporate environmental governance to decision-makers to realise the balance between economic and social objectives.

- Sustainability and Corporate Social Responsibility
- Environmental and Social Reporting
- Environmental Law
- Environmental Management and Assessment

nce it right with Our Environmental Training Programmes

Sustaining the environment is an intricate business. How can you reap both economic and environmental results from your efforts? How do you ensure that you are utilising appropriate technologies that do not harm the environment? How can you work with the public and private sector effectively? Where do you find reliable and up-to-date information? How do you **balance it right**?

The Singapore Environment Institute (SEI) is the environmental training division of the National Environment Agency. Our unique position enables us to garner the expertise, experience and resources of governmental, academic and industry partners. Hence SEI is able to deliver industry training programmes that are up-to-date, robust and well balanced.

When you participate in our programmes, you will be receiving all-rounded environmental training that helps you excel in the business of environmental sustainability.

Radiation Safety

Builds competency in the safe handling of radiation related materials and apparatus.

- Basic Ionising Radiation Safety (General)
- Basic Ionising Radiation Safety (Non-Destructive Testing)
- Basic Laser Radiation Safety

Meteorology

Decodes Singapore's weather system and other naturally-occurring phenomena so that socio-economic activities can take place safely.

- Earthquakes, Tsunamis and Tropical Cyclones
- Haze Awareness
- Lightning and Smoke Haze

PEEL

The Programme for Environmental Experiential Learning (PEEL) is a fun and interactive way to experience Singapore's state-of-the-art environmental management systems and processes.

- Clean Land Trail
- Clean Air Trail
- Clean Water Trail
- Public Health Trail
- Climate Change Trail
- Resource Conservation Trail

Professional Sharing

The Professional Sharing Series (PSS) is a knowledge sharing platform consisting of free talks and lectures by experts. Its objective is to encourage a dynamic exchange of ideas in the environment industry.

www.nea.gov.sg/sei

The Singapore Environment Institute (SEI) provides the training you need to balance it right between environmental sustainability and economic progress. As the training division under the National Environment Agency (NEA), we have been championing the environment through the development and conduct of training programmes and knowledge-sharing platforms. As a leading provider of environmental courses in Singapore, SEI garners the expertise, experience and resources of governmental, academic and industry partners. Hence we are able to deliver training programmes that are up-to-date, robust and well balanced.

Since its inauguration in 2003, SEI has trained more than 10,000 government leaders and officials, business decision-makers and the industry, as well as members of the public and non-governmental organisations. With more than 40 programmes to provide a fresh take on green issues and solutions, SEI training makes it easier to make informed decisions.

C u r r i c u l u m

Our courses are designed for the ease of transferring knowledge gained in the classroom back to the workplace. Individual learners can keep themselves informed about the requisite competencies and latest developments with SEI courses. For employers, SEI provides a convenient one-stop environmental training solution for staff development.
