

Capacity Building Programmes

Shaping the environment is an intricate effort.

Balance it right @

Balance it right with Our Environmental Capacity Building

Every country faces the challenge of sustaining the environment in its nation building efforts. Is it possible to enjoy economic and industrial progress without polluting the environment? What are the appropriate kind of strategies to adopt? How do you ensure that every citizen benefits from your initiatives? How do you **balance it right**?

The Singapore Environment Institute (SEI) is the environmental training division of the National Environment Agency. Our unique position enables us to garner the expertise, experience and resources of governmental, academic and industry partners. Hence SEI is able to deliver capacity building programmes that are up-to-date, robust and well balanced.

Our programmes provide in-depth presentations of Singapore's successful environmental strategies to help officials and organisations worldwide strike the right balance between nation building, economic development and environmental sustainability.

Environmental Protection and Management

Presents an overview of Singapore's environmental protection and management strategies for achieving the aims of Clean Land, Clean Air, Clean Water and Clean Energy.

Climate Change, Energy and the Environment

Enables participants to gain an appreciation of the issues surrounding climate change, with emphasis on the associated benefits of energy technologies.

Energy Efficiency and Renewable Energy

Introduces energy-efficient technologies and renewable energy sources as they are applied in the sectors of power generation, manufacturing, transportation and architecture.

Environmental Public Health Management

Allows participants to gain an insight into the strategies and action plans adopted by Singapore in managing the environment to contain potential public health threats posed by pollution, vectors, infectious agents and contaminated food.

Urban Air Quality Management

Familiarises participants with the policies adopted in Singapore in combating air pollution and the harmful effects to human health of air pollutants.

Environmental Planning for Sustainable Tourism

Brings participants to the heat of tourism planning and development in Singapore from the perspective of environmental sustainability.

Engaging People in Environmental Protection

Enables participants to appreciate the importance of the human element in achieving environmental sustainability, aside from infra-structural development and policy implementation.

Fighting the Dengue War

Shares Singapore's strategies in tackling the challenges posed by dengue, with presentation of a whole spectrum of public awareness programmes.

Programmes

Building a Sustainable City

Shares Singapore's experience in ensuring sustainable growth in the areas of environmental, social and economic development - much more than just being clean and green.

Environmental Governance for Sustainable Development

Takes participants behind the scenes for an exclusive look at how the National Environment Agency (NEA) designs and carries out its policies to create the living environment that every Singaporean prides in.

Towards Zero Landfill - Integrated Waste Management Strategy

Allows participants to gain an understanding of the various aspects of waste management in densely populated Singapore and how an integrated waste strategy is implemented for achieving a high standard of public health.

Zero Waste - Policies and Implementation Of 3R's

Provides participants with useful insights into waste minimisation policies and the 3R strategy, viz. Reduce, Reuse and Recycle, along with a broad understanding of the related environmental benefits.

Caring for the Dead

Introduces how columbaria and crematoria are constructed and maintained in land-scarce Singapore from the perspective of environmental public health.

A b o u t U s

The Singapore Environment Institute (SEI) provides the training you need to balance it right between environmental sustainability and economic progress. As the training division under the National Environment Agency (NEA), we have been championing the environment through the development and conduct of training programmes and knowledge-sharing platforms. As a leading provider of environmental courses in Singapore, SEI garners the expertise, experience and resources of governmental, academic and industry partners. Hence we are able to deliver training programmes that are up-to-date, robust and well balanced.

Since its inauguration in 2003, SEI has trained more than 10,000 government leaders and officials, business decision-makers and the industry, as well as members of the public and non-governmental organisations. With more than 40 programmes to provide a fresh take on green issues and solutions, SEI training makes it easier to make informed decisions.

C u r r i c u l u m

Our courses are designed for the ease of transferring knowledge gained in the classroom back to the workplace. Individual learners can keep themselves informed about the requisite competencies and latest developments with SEI courses. For employers, SEI provides a convenient one-stop environmental training solution for staff development.

C u s t o m i s a t i o n

Our training programmes are available for customisation to meet your organisation's specific needs. Full lecture delivery in Chinese and training attachments can also be arranged. Contact us for a discussion now at (65) 67319208 or email us at nea_seicustomer@nea.gov.sg.

P a r t n e r s h i p

SEI works with various local and international partners, including the Ministry of Foreign Affairs of Singapore, Civil Service College, the United Nations and governmental training agencies in countries such as China, India, Japan, Korea and ASEAN nations to conduct workshops and seminars. The aim is to build the capacity of government officials and private organisations.
