

New Burial System at the Chinese and Christian Cemetery Section

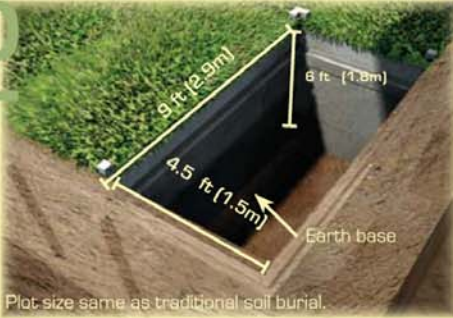

1

After the earth is dug, concrete beams are laid as foundation. Panels are then lowered into the ground to form the walls. Together with a concrete lid, this forms a new burial crypt.

挖土后, 以水泥横梁建立地基, 然后将水泥模板放入构成围墙。随后, 盖上水泥盖后便形成了墓穴。

2

During burial, the coffin is lowered into the crypt to rest on earth. Each crypt grave will hold one body.

The coffin to stay in contact with earth.

棺木将在土葬时被安置入墓穴, 每座墓穴将容纳一具尸骸。

棺材会与泥土接触。

3

The burial crypt is then fully covered with earth, before being sealed with the concrete lid
之后使用泥土完整覆盖墓地, 再以水泥盖封密。

4

Families may erect monuments of their own choice to remember their loved one.

家属可选择如同现在一般, 在墓穴上设立墓碑, 以纪念他们的至亲。
