ANNEX A

AUTHORISATION PROCESS AND FLOWCHART

The Singapore-Rwanda IA comprises three stages, corresponding to different stages of a carbon credit project's development and implementation. At each stage, Singapore and Rwanda assess applications against their respective requirements. For Singapore, projects must meet Singapore's eligibility criteria for International Carbon Credits (ICCs).

Letters of Authorisation (LOAs) are issued by Singapore and Rwanda to projects approved at Stage B. The LOAs signify that the projects are approved under the Singapore-Rwanda IA to generate carbon credits aligned with Article 6 of the Paris Agreement.

Following implementation, verification and issuance of carbon credits by the carbon crediting programme, project applicants may proceed to Stage C to seek authorisation of the mitigation outcomes generated.
