ANNEX A

CGS EXPERIENCES AND CGS PARTNERS

Through the CGS Experiences programme, members of the public can go behind the scenes at selected sites and facilities to learn how Singapore tackles environmental challenges and advances sustainability. These curated visits, including to locations not typically open to the public, provide first-hand insights into sustainability initiatives and inspire participants to take action for the environment. More information is available at www.go.gov.sg/cgs-experiences.

2. Since its launch in 2021 with four virtual tours during the COVID-19 pandemic, the CGS Experiences programme has grown steadily to offer more than 150 in-person sessions in 2026, a 72 per cent increase from 2025. In support of the Year of Climate Adaptation, the programme has also introduced new learning journeys that provide practical, behind-the-scenes insights into Singapore's climate risks, adaptation efforts and how individuals can prepare for a changing climate. These include:

i. **Behind-The-Scenes of Central Forecast Office** – Learn how the Meteorological Service Singapore (MSS) monitors weather conditions and produces forecasts, and how timely weather information supports Singapore's preparedness for changing weather and climate conditions.
ii. **The Pullman Singapore Orchard Eco Journey -** Discover how sustainable hospitality practices, including energy efficiency, food waste reduction and urban farming, can strengthen climate resilience.
iii. **Sentosa Eco-Odyssey Tour** – Explore the island's biodiversity and conservation efforts, green hospitality practices and climate adaptation solutions to combat heat stress in public spaces.
iv. **Behind-the-Scenes: Discover How Singapore Recycles Right** – Explore Cora Environment's Material Recovery Facility to discover what happens beyond the recycling bin, from the sorting and recovery of recyclables to the processing of returned beverage containers under the Beverage Container Return Scheme (BCRS). Gain insights into how Cora's Counting and Sorting Facility uses AI enabled sorting technology and modern infrastructure to supports Singapore's recycling efforts and helps give valuable materials a new lease of life.

3. The breadth of CGS activities is made possible by partners across the Public, Private and People (3P) sectors, who contribute their expertise, resources and platforms towards making Singapore A Liveable and Endearing Home, and A Vibrant and Sustainable City. The CGS satellite events bring these partnerships to life. Partners supporting this year's CGS satellite events include:

Date	CGS Satellite Event	Partners
19 Sep 2026	LitterLifters+ (Islandwide Edition)	LitterLifters+ was co-organised by **Youth Corps Singapore** and **Public Hygiene Council (PHC),** in partnership with PAssion Wave and Stridy. Held in conjunction with World Cleanup Day and in support of CGS, the initiative brought together close to 500 youths for a mass clean-up across beaches, streets, and waterways.
3 Oct 2026	Urban Sustainability Bike Tour @ Joo Chiat	This event brought together a range of 3P partners: • The **Society of Tourist Guides (Singapore) (STGS)** partnered NEA to develop and conduct the guided bike tour, sharing sustainability insights along the Joo Chiat route.

		• **Anywheel** and **HelloRide** supported the bike tour by providing shared bicycles for participants, while Decathlon provided refurbished bicycles. • **Coca-Cola Singapore Beverages** supported the event by providing canned drinks carrying the Beverage Container Return Scheme 10-cent deposit mark, while **Zappy** provided cooling wet wipes for participants to freshen up. **HDB** facilitated the use of the Joo Chiat Complex as the tour's meeting and flag-off point, while **LTA** supported the bike tour as part of the Joo Chiat Car-Free Day.
10 Oct 2026	International E-Waste Day	IEWD was co-organised by **ALBA** and NEA and featured booths showcasing sustainable solutions, products and projects from producers, retailers and Institutes of Higher Learning (IHLs) such as Brother, Casa, Gain City, ITE College East, MOBOT, Pick, Singapore Polytechnic, SONY, SPX and Virogreen.
22 Oct 2026	Race to Sustainability! 2026	**Gardens by the Bay**'s *Race to Sustainability!* brought together a range of agencies and partners: • **Nanyang Academy of Fine Arts (NAFA)** displayed student works that aim to raise awareness for environmental sustainability among the general public. • **Mercedes-Benz,** the event's main sponsor, contributed educational content for RTS' station markers, sharing how the company is working towards more sustainable mobility across a vehicle's life cycle globally, from lower-carbon materials and electric drive to battery recycling. • **National Geographic Explorers** spoke at the corporate and youth sustainability symposiums, and conduct sustainability-themed workshops during the Weekend Sustainability Fair. • **Building and Construction Authority (BCA), Civil Aviation Authority of Singapore (CAAS), Gardens by the Bay, Housing & Development Board (HDB), National Environment Agency (NEA),** and **Singapore Food Agency (SFA)** contributed educational content for RTS' station markers. These partners will also contribute interactive booths at the Weekend Sustainability Fair on 19 and 20 December, enhancing participants' understanding of sustainability topics.

4. Organisations can support CGS by making their environmentally friendly facilities available for public visits through CGS Experiences programme. They can also host learning journeys or other public engagement activities on environmental topics. Organisations can indicate their interest via go.gov.sg/cgspartners.
