

## Pre-Approved Energy Efficient Technologies

The following technologies will be provided with 70% support of the qualifying costs, subject to a corresponding grant cap per facility.

Pre-approved technologies	Qualifying Criteria	Corresponding Grant Cap per Facility
Lightings	<ul style="list-style-type: none"> <li>• Retrofit of non-LED lightings to LED lightings with efficacy of 100 lumens/watt</li> </ul>	\$200,000
Air-conditioning	<ul style="list-style-type: none"> <li>• Retrofit of air-conditioning with no more than 3 ticks to air-conditioning with 4/5 ticks</li> </ul>	\$200,000
Compressed Air System	<p>You must meet any of the criteria below:</p> <ul style="list-style-type: none"> <li>• Replacement of compressed air system with air blowers; or</li> <li>• Replacement of compressed air system complemented with:               <ul style="list-style-type: none"> <li>○ Variable Speed Drive<sup>^</sup>; or</li> <li>○ Air Receivers; or</li> <li>○ Zero Purge Desiccant Dryers</li> </ul> </li> </ul> <p><i><sup>^</sup> Only applicable when there is proof of variable loads/demands and variable loads/demands is more efficient</i></p>	\$350,000
Boiler System	<p>You must meet any of the criteria below:</p> <ul style="list-style-type: none"> <li>• Replacement of boiler with heat pump; or</li> <li>• Replacement of boiler system complemented with:               <ul style="list-style-type: none"> <li>○ Economizer; or</li> <li>○ Condensate heat recovery; or</li> <li>○ Combustion trim system on burner that has an electronic gas/air ratio</li> </ul> </li> </ul>	\$350,000
