*Delete where applicable

Other information (please fill in the required information)

1. The development consists of _____ number of residential units and/or _____ number of non-residential units.
2. The development is currently serviced by _____ (name of waste collector).
3. The refuse handling system within the development is via bulk bins / compactor / pneumatic waste conveyance system. (Please circle one)
4. Existing contract, if any, with a General Waste Collector (GWC) is due to expire on _____ (date).
5. If your development already has an existing private contractual agreement with a waste collector, and choose to opt into the public scheme, the option will take effect from the date of expiry of the current contract (i.e., the appointed Public Waste Collection (PWC) Licensee will begin servicing your development after the expiry of the private contract and charges levied from the point of serving the MCST).
6. MCSTs that have opted to use the services of the Public Waste Collection (PWC) Licensee will be required to use the services of the appointed Public Waste Collection (PWC) Licensee for the duration of the entire license period. Owners/occupiers of premises are not allowed to withdraw from the scheme for the period.
7. The MCST can engage the appointed PWC for the removal of the bulky items and garden waste at a separate, mutually agreed fee. Alternatively, the MCST may choose to engage any licensed GWCs to remove these wastes.
8. **The appointed PWC shall carry out waste collection between 7am to 7pm according to a fixed collection schedule.** The waste collection timing cannot be changed to suit every development's preferred timing. The appointed PWC shall inform the MCST of the collection arrangements nearer to the commencement of services.
9. If there are non-domestic premises carrying on businesses in the private apartment / condominium development, the PWC is required to provide separate standard wheeled bins to these premises. However, do note the refuse collection fee will be differentiated by refuse output levels and will not be the same as the domestic fee. The PWC will notify these non-domestic premises of the fees nearer to the commencement of services.

Table: Contract periods and PWCs

Sector	Contract Period	PWC
Clementi-Bukit Merah	1 Jan 2021 – 31 Dec 2027	Sembwaste Pte Ltd
